CASTING ALLOYS

ADC12

MATERIAL / REFERENCE CONDITION

Aluminum die-casting alloy

Typical applications Thin-wall housings and intricate cast components

Material type	Aluminum die-casting alloy
Condition / reference grade	As-cast; specify any secondary treatment
Manufacturing	Die casting · secondary machining
Reference data	Use the ADC12 specification; do not replace it with A380 based only on similar applications.
Specification notes	Specify porosity, sealing, coating and critical machined surfaces. Reference values are not billet properties.
