ELASTOMERS

FKM

MATERIAL / REFERENCE CONDITION

Fluoroelastomer

Typical applications Heat- and chemical-exposed seals

Material type	Fluoroelastomer
Condition / reference grade	Specify compound code, cure system and hardness
Manufacturing	Molding · application-specific finishing
Reference data	Material-family guide: polymer type and cure system influence fluid compatibility.
Specification notes	Specify actual chemicals and temperature; FKM is not universally compatible. Confirm the selected compound before production.
