ELASTOMERS

EPDM

MATERIAL / REFERENCE CONDITION

Ethylene propylene diene rubber

Typical applications Weather-exposed and water-service seals

Material type	Ethylene propylene diene rubber
Condition / reference grade	Specify compound code and Shore A hardness
Manufacturing	Molding · application-specific finishing
Reference data	Material-family guide: select the compound and consult its test data.
Specification notes	Confirm fluid compatibility; EPDM is generally unsuitable for mineral oils. Confirm the selected compound before production.
