ENGINEERING PLASTICS

PTFE

MATERIAL / REFERENCE CONDITION

Polytetrafluoroethylene

Typical applications Seals, valve seats and low-friction interfaces

Material type	Polytetrafluoroethylene
Condition / reference grade	TECAFLON PTFE natural (example)
Manufacturing	Machining or molding; confirm grade-specific route
Reference data	Use the TECAFLON PTFE column in the supplier's stock-shape reference.
Specification notes	Specify virgin or filled PTFE; creep and thermal expansion affect fits. Branded examples are references, not a statement of stocked brand.
