SHEET STEEL

SECC

MATERIAL / REFERENCE CONDITION

Electrogalvanized steel sheet

Typical applications Amplifier chassis, equipment covers and sheet-metal brackets

Material type	Electrogalvanized steel sheet
Condition / reference grade	Specify zinc coating, passivation and oiling
Manufacturing	Laser cutting · bending · punching
Reference data	Specify sheet thickness in mm, coating designation and required mechanical properties.
Specification notes	SECC is not a deep-drawing grade. Coating mass and cut-edge protection are separate requirements.
