ELASTOMERS

TPU

MATERIAL / REFERENCE CONDITION

Thermoplastic polyurethane

Typical applications Flexible wear parts, protective covers and seals

Material type	Thermoplastic polyurethane
Condition / reference grade	Specify exact Elastollan grade (example family)
Manufacturing	Molding · application-specific finishing
Reference data	BASF range tables separate hardness, density, tensile and elongation by product code.
Specification notes	Choose polyester or polyether chemistry and Shore A/D hardness; do not combine values from different variants. Confirm the selected compound before production.
